Introduction

Echo City Komagatake was established in 1994. This cable TV broadcast programs to 1 city, 1 town and 2 villages. The Mayer of Komagane city works as our president and our stocks are held by shop keepers or farmers in our area. We provide services to our local citizens.

▲DV-7DL PRO SE

System

We use DVCPRO VCR as source/recording device. It's digitally connected with DV-7DL PRO via DV cable. All the editing/titling/audio process can be completed on DV-7DL PRO.

Point of Selection

We face mechanical problem of linear editing system and need to purchase new editor very urgently. We asked several CATVs in same prefecture and found all of them were using DV-7 series. We checked operation at CATV Expo at Tokyo and decided to purchase it. We could drastically improve the speed of editing after purchase.
