■ Introduction

Matsuzaka Cable TV station was established in 1993 by investments of Matsuzaka city and local companies. We moved to new building in Oct.,2003 to expand our services. At the moment, we cover 2 cities and 4 towns in Matsuzaka area.

Apart from the programs made by students, we make and broadcast 3 original programs per day. 6 staffs are using DV-7 series. We cannot do this without this extremely speedy machine.

■ Point of selection

People without editing experience can complete sequence very smoothly on DV-7 series. Our staffs also have no experience of Nonlinear editing. But no problem to start it with DV-7. Especially the menu in easy to understand Japanese make them feel relieved.

■ System

We purchased 5 units DV-7DL PRO SE and 4 units of those are loaned to high schools in this area. We lecture the technics of shooting and editing to students. Now we broadcast the programs made by students once per month.
