- S-0816 8x16 FOH unit x 10
- S-4000R Remote Controller x 8
- S-4000SP REAC Splitter x 5
- S-240P External Power Supply x 6

**Introduction**

SBA was founded as professional sound company in 2000. The team with 18 years experience in the market is dedicated to develop every element of sound engineering like PA, acoustics, installation, recording and TV program production. In these couple of years, they have been responsible for audio managements of major TV programs in Spain broadcasted by nation wide network stations.

**Point of Selection**

- Ramon Fernandez, SBA Manager
- Carlos Crespo, SBA Manager

We think two elements are essential for our business, sound quality and ergonomics. RSS Digital Snake with REAC technology provided us both. In addition, we have system that has chance to grow according to our needs.

Our customers sometimes request us to add input/output units at the locations with difficulty, long distance or very limited space to access. However, the REAC connection with slim and lightweight CAT5e cable made it possible and very easy.

REAC provided us another benefit, multi-track recording of high quality sound with Cakewalk SONAR. We are enjoying this unique solution. About the sound quality, we like to mention about pre-amps in the stage units. Remote control provides convenience to sound engineers and the Zipper-free quality is highly appreciated by engineers and producers.

**TV Programs produced by S.B.A. with Digital Snake**

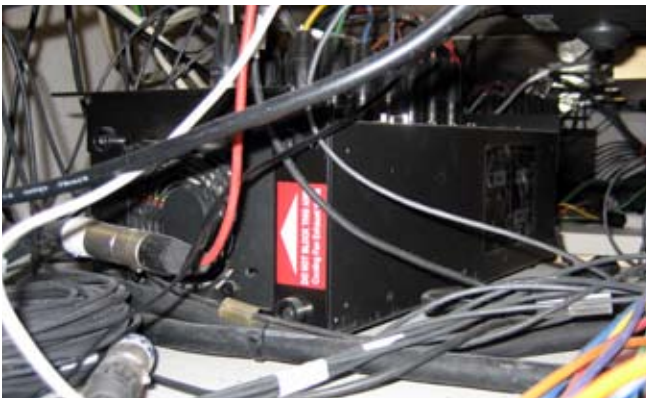

YEAR	PROGRAM	TV STATION	SYSTEMS
2005	LA CASA DE TU VIDA 2	T5	S-4000
